Project Report from: Mostakim Hossain

Submitted to: MS. Tanzilah Noor Shabnam (Tns1)

My progress:

- MongoDB Database and collections created.

- Create, Read, Update and Delete have been tested using postman and are working except register.js and login.js. These two are done by another groupmate.
- Added email validation so that a person who doesn't enter a valid email cannot register.
- Added sign up with google functionality.
